

	Earned	Possible								
<b>iOS App</b>										
<b>Making the Data Model and Extracting a Service</b>										
2 - the data model is represented as a class	2	2								
2 - any attributes displayed in the cell are in this class	2	2								
2 - the app stores its data model instances in a service class, not in the view controller	2	2								
2- there are at least 15 instances of the data model in the collection returned from the service (Half credit if there are some, but few)	2	2								
<b>Scroll-Resilient Table Views</b>										
When you swipe (or tap, if they didn't succeed with swipe) to change the view of a cell and then scroll down, the view changes are properly reset for cells as they appear onscreen.	5	6	Not able to check as it doesn't mark the cell.							
<b>Navigating to a Detail Controller</b>										
List view is embedded in a navigation controller: 4	4	4								
There is a back button on the top of the detail screen : 4	4	4								
<b>Navigation Bar Changes</b>										
4 - The title starts out large and then when you scroll down on the table view it becomes small.	0	4								
4 - The navigation bar is some color.	4	4								
<b>Swipe Gesture</b>										
The swipe gestures work on the table view	9	10	(+4 bonus possib Excellent work. You just needed to add the fire icon when the "Not Eaten" button was checked.							
<b>Submission</b>										
Rather than submitting to the main branch of your ios repo, start a separate branch called data-model-for-cells, push that branch, an	8	8								
<b>History of the Internet: Birth of the iPhone Questions</b>										
Who was FingerWorks designing their touch screens for?	2	2								
What did Steve Jobs originally think of releasing a phone with capacitative touch technology?	2	2								
Among Apple enthusiasts and mobile developers, there's a common idea that Steve Jobs was a lone genius who single-handedly developed the iPhone by himself. Are they right? How do you think that that idea impacts the mobile development community?	4	4								
Can you think of any other public figures in technology right now who have a similar "lone genius" reputation to the one that Steve Jobs had?	2	2
